Job Description

The Safety Technician is responsible for ensuring workplace safety standards are upheld. This involves performing regular safety audits, providing safety training, maintaining safety equipment, and investigating accidents. The role requires a meticulous attention to detail, excellent communication skills, and a strong understanding of health and safety regulations.

Education & Experience

• Associate's degree in Occupational Health and Safety, Environmental Science, or related field (Bachelor's degree preferred).
• Certification in safety management (e.g., OSHA, NEBOSH) is highly desirable.
